

Commitment Declaration

IBV & Cie s.a. actively pursues initiatives aimed at enhancing sustainable biomass practices.

Renewable Energy Directive III

Our company is committed to meeting the requirements set forth in legislation, the REDIII (EU Directive 2023/2413), and the EU-approved certification systems we have adopted. Our company produces pellets from low grade stemwood & processing residues. Our CHP consumes waste woods, processing residues & residues from landscape thinning.

Forest biomass in scope of RED is sourced in accordance with the sustainable forestry criteria stated in RED Article 29, paragraph 3, points (a), (b), (d), and (e); paragraph 4, point (a); and paragraphs 5, 6 and 7. Sourcing from primary forests, heathland, and natural highly biodiverse grasslands is not permitted. Sourcing from highly biodiverse non-natural grasslands and highly biodiverse forests, wetlands, and peatlands is only allowed if all RED criteria are fully met.

We manage our data and mass-balance accounts in accordance with REDIII and the requirements of the certification systems, ensuring the traceability of sustainable biomass.

Stakeholder engagement

At our company, we believe in working closely with responsible stakeholders and business partners. We actively follow the developments in the field of new regulations and agreements concerning the sustainability and legality of wood resources and engage with stakeholders in multiple ways.

We invite stakeholders and interested individuals to contact us, whether to obtain further information about our company and corporate policies, or to discuss concerns regarding our business or supply chains. We can assure confidentiality to whistle-blowers.

Our Stakeholder Engagement Plan and Complaints & Comments Procedure are provided upon request.
